Utah Chapter IAEI

Presents a One Day Seminar on 2 separate days at the same location

Services, Feeders, Wiring Requirements, and Wire Sizing: By Doug Smith with WC3

8 Hour Class = 0.8 C.E.U.’s – This is a preferred provider class
(CEU’s count toward Electrician and Inspector Licenses, but not for Contractor Licenses)

This is an 8 hour class held at Scheels, presented on March 3rd or 4th. The 8 hour course will focus explaining the key requirements of NEC Articles 230, 225, 300 and 310. Topics covered will include: definitions, overhead wiring and supports, overhead clearances and supports, minimum size and rating, underground conductor installations, service equipment, service disconnecting means, overcurrent protection for services and feeders, and ground-fault protection of equipment. In addition, the following wiring requirements will be covered: general wiring requirements, protection of conductors from damage, wet locations, securing and supporting, mechanical continuity, raceway installations, ampcities of conductors, ampacity derations and adjustment factors, terminal ratings, and identification of conductors. Examples and calculations will also be presented in order to walk the class through how to properly size wires, including wire ampacity derations.

Enter Scheels at North Entry, Doors will only be open from 7:45-8:15, then re-open again at 9
If locked call Layne at 801-870-4302 or Doug at 801-870-4307 for assistance
